### **Engineer (General), 525-7**

The purpose of this position is to provide a professional engineer capable of performing engineering design assignments of medium/large size complex non-conventional nature in mechanical engineering part of the architectural design and engineering field.

1. As a Project Engineer accomplishes medium/large size complex non-conventional engineering assignments. Performs engineering studies, site investigations and survey, and designs; completes advance planning and prepares schematic and working drawings on new construction, alteration and major maintenance of facilities, systems and equipment for Navy contracts for the Commander Navy Region Japan, and for all Navy contracts for all other supported Commands in Japan and Okinawa.
2. Reviews designs and drawings for medium/large size complex non-conventional projects which are prepared by A&E (Architectural and Engineering) and Design/Build contractors, including those of MCON's prepared by the Corps of Engineers, USARJ, for conformance with NAVFAC directives and technical accuracy. Prepares review findings and recommendations for corrective actions or alternative solutions to engineering problems. Compiles technical data for A&E contractors.
3. Performs work involved in preparation of engineering plans and drawings for small sized/conventional projects containing a few complex features in CNRJ area of responsibility.
4. Compiles technical data for A&E contractors.
5. Performs other related or incidental duties as assigned.
